SUMMARY

Full-stack developer with 2.5+ years of professional experience shipping web apps, mobile apps, AI tools and automations with Next.js, React Native, Node.js and Supabase — for clients in India, Qatar, UAE and Ireland. Since 2024 I've delivered 10+ client projects and built 11 products of my own — from a Chrome extension and an npm package to desktop and mobile AI apps. I teach what I build to ~19K followers on YouTube (CodeCoders) and Instagram (@faizu.dev).

EXPERIENCE

Freelance Full-Stack Developer · Self-employed · Remote — Aug 2024 - Present

- Building a multi-tenant IPTV player platform for an Ireland-based client: React Native mobile player, web player, reseller admin panel and Node.js backend.
- Glowell Hub (UAE education platform): built across 3 apps (student web app, Flutter mobile app, LMS/CRM admin); migrated media to Supabase Storage, built partner fee management and shipped APK/AAB builds.
- Business Stanely & Legal Stanely: led frontend–backend integration of task management and CRM platforms for advocates and business teams; co-built a Concept Map MVP for another client.
- Deployed and extended a self-hosted WhatsApp CRM with Docker/Dokploy and n8n-powered AI auto-replies; ran a technical audit of a NestJS/Next.js/Flutter super-app for a Gulf client.

Full-Stack Developer · Axorbit Technologies Pvt Ltd — Jan 2025 - Jul 2025

- Architected a cosmetics e-commerce platform with Sanity CMS, Clerk authentication and geolocation-based currency switching.
- Deployed backend services on AWS following modular, production-ready patterns.

Junior Developer · Final Apps — Feb 2024 - Aug 2024

- Contributed to 2 Shopify App Store apps (dual pricing, invoicing); migrated major features from React to Remix.
- Built custom components with Shopify Polaris and GraphQL, working directly with the CTO.

Founder & Creator · CodeCoders (YouTube) · @faizu.dev (Instagram) — Mar 2024 - Present

- 340+ Malayalam tutorials on AI tools, n8n automation, Next.js, React Native and MERN; 9.4K+ YouTube subscribers and 10K+ Instagram followers.
- Tutorials generate inbound freelance clients; recognized by the n8n team for community contributions.

SELECTED PRODUCTS

n8n AI Workflow Generator · Chrome extension · 240+ users
Search 11,000+ n8n templates and generate workflows with OpenAI, Claude or Gemini inside the n8n editor; works with self-hosted instances.

ReelStash · React Native · Supabase · pgvector
AI app that transcribes, tags and summarizes shared reels, with semantic search and a RAG "ask your library" chat.

Jarvis — AI Command Center · Electron · TypeScript · Claude Agent SDK
Voice-and-vision desktop assistant over Claude Code and Codex: offline wake word, plan-limit routing, AI agent studio, memory, routines and camera/screen questions.

Reminder Companion · Electron · paid desktop app
24 animated 3D buddies walk on screen with water, stretch and eye-rest reminders. Windows and Mac, with one-click updates.

SKILLS

Languages	JavaScript, TypeScript, HTML, CSS
Frontend & Mobile	React, Next.js, Angular, Remix, Redux, React Native, Expo, Electron, Tailwind CSS, Shopify Polaris
Backend & Data	Node.js, Express, NestJS, Supabase, PostgreSQL, MongoDB, Redis, pgvector, GraphQL
AI & Automation	Claude Agent SDK, n8n, OpenAI / Claude / Gemini APIs, RAG, Whisper, Kokoro TTS, WhatsApp Business API
Cloud & DevOps	AWS (EC2, Amplify, Lambda), Vercel, Render, Docker, Dokploy, Nginx

EDUCATION & TRAINING

Full-Stack Development Program — Brototype — Mar 2023 - Feb 2024
MERN training — 2 major and 10+ minor projects during the program; awarded "Best Communication Coordinator".
